

New and Improved Restaurant Sanitation Cards

Know the Score

What's new on the wall beginning August 1?

The new score card has a larger number so you can easily see the letter grade and the number score. It's bigger, it's clearer and it is easier to read!

Why the change?

State and local government work with the foodservice industry to make sure that food is safe to eat. The larger number is easier to see so it allows the customer to have more information when choosing a restaurant.

Is the inspection different?

No. The inspection process, inspection sheet, number of inspections per year and the points taken off for violations are still the same.
